How God Made the Dachshund

God made a little dachsie to brighten up our day ~
He took a bit of sunshine ~ laughter, love, and play ~
and rolled it up in a sausage shape just right for a hug,
with bright eyes full of mischief set in its little mug.
With little paws a pattering, to take it here and there ~
and a cold wet nose ~ but then he thought, "Oh, what about the hair?
Shall I make it long and silky, or wiry, that's so sweet,
or make it simple, and have it smooth and satiny and neat?
And what about the color ~ how can I pick just one?
Shall it be black, or red or brown or dappled, just for fun?"
He pondered while he made the world, and all creatures great and small ~ and then the answer came to Him ~ "OF COURSE! I'll make them ALL!"
So remember that a dachshund is special, a gift from above ~ His coat of many colors is a sign of God's abundant Love.

Just for Fun You Decide...

There was a young man of 28 who lived in a rural area where four families shared a wooded backroad driveway. One of the other families was a single elderly woman of 87 who shared her life with a black labrador. She enjoyed dressing her dog and he went out every morning wearing his black coat for warmth. As you can easily envision a black dog wearing a black doggie coat on a dark winter morning doesn't provide an obvious clue that there is a dog in the driveway. The young man and his neighbors have almost struck the dog numerous times, The young man approached the woman to express his concern for the dog's safety, but she refused to discuss any changes to her dog's morning routine. In the spirit of being a kind and caring neighbor, he took the dog's coat off and sprayed it with fluorescent paint and put it back on the dog. He faithfully thought he was doing a good deed… The woman was furious threatening a lawsuit…

Duke and Daisy are from different litters and they were adopted together by a very special family. They live in South Carolina.

Dachshund Rainbow

Dachshunds are the only breed that has so many variations in their coat with a wide range of colors and patterns.

Colors: red, black & tan, chocolate & tan, blue & tan, Isabella (fawn) & tan, shaded cream and solid cream. Points can also be cream instead of tan.

Patterns: Dapple, Brindle, Sable and Piebald. Standard colors have a solid coat with tan or cream points. Although possible, it is very rare for a dachshund to be a solid color with no distinct point colors.
